

PM-1

Programming software
for computer-controlled
sewing machines

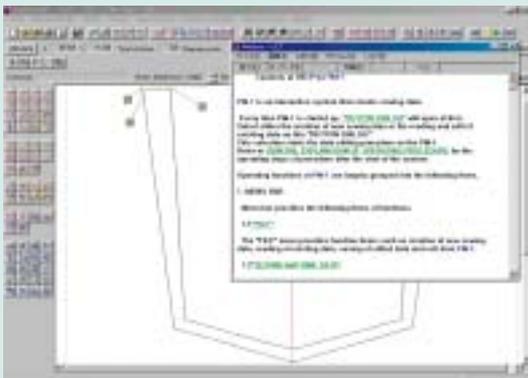

*It is easy, accurate, and fast !
This data programming software
is full of new functions.*

This software is to input and edit sewing data of JUKI's latest sewing machines.
Its versatile input functions allow to input sewing data of each electronic sewing machine model easily, accurately, and quickly.
It supports high quality production with high added value by utilizing and creating original data for specific designs and applications.

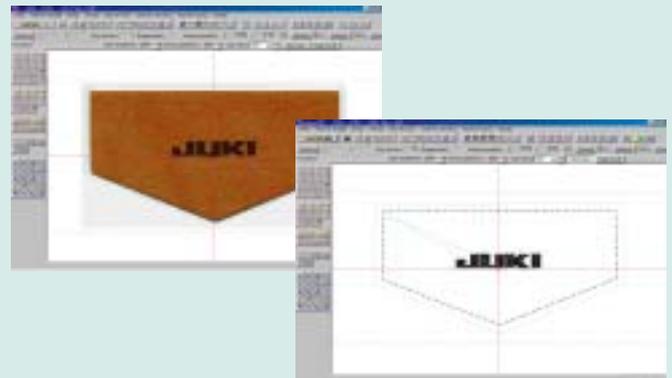

JUKI®

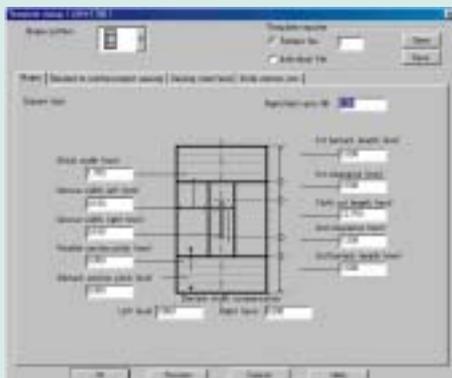

Create sewing data in an interactive manner during viewing screen displays.

Input image (BMP file) copied by a scanner.

Equipped with template functions that allow to create sewing data easily by input each parameter (For LBH-1790).

Coordinates entered can be corrected and re-edited by keyboard input.

Equipped with a data preview function that displays data configuration before reading sewing data.

Sewing sequences can be checked easily by a function of coloring needle drop points.

■ Models suited for PM-1
