Yamato's CF series strongly help you to win success from the most crucial competition at quality,cost,and delivery.

Offering ideal seam.

Yamato's seam is high in elasticity and strong in durability. You can enjoy high quality finish.

Keeping out the small dust.

The oil can stay clean with a filter, which is easy to replace.

There is no problem in sewing with synthetic fiber thread.

HR Device (Silicone supplying unit for needle point)and SP Device (Silicone supplying unit for needle thread) to avoid thread breakage and skip stitch are equipped as standard.

Easy threading.

Threading for looper thread can be easily done by swinging up thread take-up eyelet.

Easy way to prevent skip stitching.

Fine adjustment of Looper locus according to needle size can be done easily.

Pushbutton stitch length regulator.

Stitch length is freely adjustable with pushbutton system. The pushbutton can also be locked to prevent the set stitch length from being changed against your will.

Solving oil leakage.

New oil seal prevents oil from leaking at needle bar area.

Lever-adjustable differential feed.

Differential ratio according to materials can be adjusted by pushing a lever up and down. Differential lever can be adjusted even while the machine is running. The lever is completely covered at the time of sewing so that smooth flow of fabric is obtained.

Ready-to use package and easy handling(CF2300M).

In addition to newly designed covers with which operators can set their hands closer to needle dropping point, user friendly fabric guides are included for good quality finish in hemming and covering.
