## UTL Device for VG/VGS SERIES

Automatic Under Thread Trimmer  
with Anti-Unraveling Function for VG/VGS Series

### Anti-Unraveling Function

Usual  
Thread Trimmer

UTL Device

UTL device cuts the under thread at two points of "A" and "B" as the left picture. As "C" becomes the thread end, it prevents the seam from unraveling, unlike the case of only "A" is cut at the end of the seam.

### Compact Design

The device is housed inside without changing the design of Cylinder Bed.

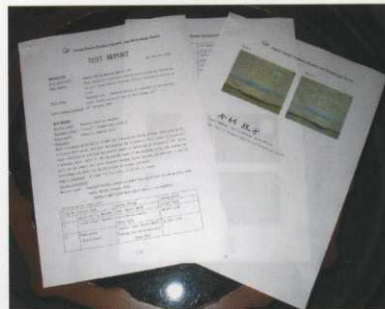

UTL can be installed in a machine equipped with UT device, no wasting of your present equipment.

### Applicable for:

- UTL-A34 :  
VG2700 class、VG2790 class  
VGS2700 class、VGS2790 class
- UTL-A44 :  
VG3721 class、VGS3721 class  
VG2735 class

- \* UTL-A\*\* device requires exclusive motor.
- \* HR device and SC25 device are not applicable.

\* The anti-unraveling function has been proved as effective by Washing Test implemented by an accredited Japan National Laboratory.

Specification and appearance on this catalogue are subject to change without notice.  
For correct handling of products described on this catalogue, please read instructions carefully before operation.
