## YAMATO VG2700-8, VG3721-8

## 2, 3 NEEDLE CYLINDER BED INTERLOCK STITCH MACHINE WITH ACTIVE THREAD CONTROL

If you are looking at further flexibility for the recent frequent and big change in sewing condition, YAMATO VG-8 is the right machine. YAMATO VG-8's "Active Thread Control(PAT.P)" performs epoch-making soft and elastic seams suitable for lady's intimate garments with "microfiber", which is lightweight, soft and stretchable. It is also applicable for neatly tightened seams, ideal for the outer knitwear by the simple and "visible" adjustment. Besides, "Non-stain(PAT.P)" technology is introduced to minimize oil stains on your products.

YAMATO VG-8 helps you winning further confident from your clients with your improved quality and quicker response.

Submodels equipped with YAMATO VG-8's "Active Thread Control" performs epoch-making soft and elastic seams and helps your quicker response to the frequent change in sewing condition.

### VG2700-8

2, 3 Needle Cylinder Bed Interlock Stitch Machine for Hemming and general seams

### VG3721-8

2, 3 Needle Cylinder Bed Interlock Stitch Machine for Hemming, with Left hand Fabric Trimmer  
Left hand Fabric Trimmer trims edge of fabric for neat finish.

### VG2740-8

2, 3 Needle Cylinder Bed Interlock Stitch Machine for Hemming

Exclusive sewing parts and fabric guides suitable for good quality hemming operations are equipped with the VG2740-8.

### Active Thread Control(PAT.P)

Unlike the conventional way of thread control, which mainly use tension (resistance) on each thread, YAMATO "Active Thread Control" takes in and draws back thread when it is required, and well-balanced seams with minimum necessary tension(resistance) for thread regulation. Besides, wide variety of seams, from soft and elastic seams to standard seams, can be performed by the simple and "visible" adjustment, not by the "fuzzy" adjustment using thread tension devices.

### "Non-stain" (PAT.P)

While giving enough lubrication for the internal driving mechanism, Yamato exclusive sealing system prevents the oil from coming to the sewing area through moving parts. This feature minimizes the risk of oil stain, one of the most frequent causes of defects.

Saving - "Non-stain" increases productivity.  
"Non-stain" finish minimizes your loss, such as downtime and extra cost caused by spot removing operations.

Good performance and long life- durable machines  
Yamato "Non-stain" technology will not sacrifice the performance and the durability of machines, but keep the machine running smoothly at high speed for long life.

■ Tunnel free finish for better appearance and comfort-to-wear garments.

■ Applicable for wide variety of sewing condition by Replaceable Stitch Plate  
Stitch Tongue(VG-8 only)

■ Simple cancellation of trimmer for further flexibility.(PAT.P)  
Quickly switchable into the "non-trimmer" model for several different operations.

■ Micro Adjuster for easy fine adjustment.(PAT.P)

- Trimming position is easily adjustable while keeping engagement of knives.
- Applicable for different hemming styles with little downtime

■ Optional kits

Walking Presser Foot for Hemming(WF1) etc.
