

## PS-700 Pattern seamer (X:1,200mm × Y:700mm)

## Large Sewing Area

This is a pattern seamer provided with JUKI's first exclusive machine head. It is able to carry out pattern sewing of large products with flexibility. The PS-700 has achieved the industry's highest jump speed of 800 mm/s.

Active tension has been introduced to the needle thread tension controller. Since the needle thread tension is reproducible, supporting a broader range of sewing conditions, the time required for setup changing upon process changeover can be reduced.

X Template is not included.

# Increased productivity

# Excellent quality

The auxiliary clamp holds down the template and material, thereby securely holding the material being sewn. The PS-700 has adopted the guide rail feed mechanism which feeds the template while clamping it with its guide rail. This mechanism demonstrates higher feed accuracy in comparison with the roller feed mechanism, thereby improving seam quality.

% The barcode reader reads the barcode on the cassette clamp and automatically selects the corresponding sewing pattern.

With this sewing machine, quilting and runstitching processes for sewing down jackets and winter sportswear can be carried out only with one setup operation. Conventionally regular-interval topstitches have been sewn with a lockstitch machine and the seam quality varies according to the operator's skill. Now, with the PS-700, regular-interval topstitches of stable quality can be sewn without depending on the operator's skill, thereby contributing to substantially increased productivity.

#### **BK-7 (Bobbin changer)**

Since the PS-700 sewing machine has a large sewing area, frequency of bobbin thread changing is likely to increase. To facilitate bobbin thread changing, the exclusive bobbin changer has been developed for this sewing machine. As many as eight bobbins can be set in the bobbin changer at a time, thereby further increasing productivity.

### **OPTIONS**

• Programming software for computer-controlled sewing machines [PM-1] Ver.3

With the PM-1, every detail of design of a sewing pattern can be created on the computer screen. In addition, patterns can be edited with ease also on the operation panel which is provided with the input function.

• Bobbin changer : BK-7 40186582 (Bobbin, Bobbin case set : 40190539)

#### SPECIFICATIONS

Model name	PS-700					
Maximum sewing speed	3,000sti/min					
Jump speed	800mm/s					
Possible sewing area	$Width(X)1,200mm \times Length(Y)700mm$					
Stitch length	0.1 – 12.7 mm (in increments of 0.1mm)					
Needle bar stroke	39.8mm					
Needle thread tension	Active tension (computer-controlled thread tension control mechanism)					
Needle	DBx1 (#9 to #16)					
Hook	Full-rotary double-capacity hook					
Memory medium	USB thumb drive					
Storage of pattern data	Memory in the main body:Max. 60,000 stitches; 999 patterns (Max. 60,000 stitches per pattern)					
	External memory (128 MB) Max. 999 patterns (Max. 60,000 stitches per pattern)					

\* "sti/min" stands for "Stitches per Minute."

#### WHEN YOU PLACE ORDERS

Please note when placing orders, that the model name should be written as follows:

	Seam type	Co	de	
	Standard	S	;	
Ρ	S700	S	<b>)</b>	

	Option		Control box	Code				
Needle cooler	Pen holder	Bobbin thread remaining detector Part No.(40173537)			Code		Single-phase 200~240V	K
Part No. (40173517)	Part No. (40173516)		Code			Single-phase 200 ${\sim}240V$ (for CE)	Ν	
			ZZ					
0			A1					
	0		A2					
		0	A3					
0	0		A4					
	0	0	A5					
0		0	A6					
0	0	0	A7					

#### $\bullet$ To order, please contact your nearest JUKI distributor.

• The sewing machine complies with the "Juki Group Green Procurement Guidelines" on the use of hazardous substances, which is stricter than other restrictions, such as those of the RoHS Directive.

For details of JUKI ECO PRODUCTS, refer to: http://www.juki.co.jp/eco\_e/index.html
\*The RoHS Directive is an EU Directive limiting the use of 6 hazardous substances (lead, hexavalent chromium, mercury, cadmium, PBB and PBDE) in electrical and electronic equipment.
The Juki Green Procurement Guideline is the voluntarily established criteria to eliminate not only the aforementioned six substances, but also other ones which also adversely affect the environment

Registered Organization : JUKI CORPORATION Head Office The Scope of the Registration : The activities of research, development, design, sales, distribution, and maintenance services of industrial sewing machines, household sewing machines and industrial robots, etc., including sales and maintenance services of data entry systems.
